## About Me

3rd year software student, more interested in practical work and further self-development than studies. I have acquired the ability to learn independently, cope well, work in a team, and be responsible. I am confident that I can quickly get used to any job and learn. Just outside of class, various programming languages are being used independently and at a slightly modified level.

## Education History

**High School in Olonlog**  
**Year of Graduation: 2021**
